

Prejudice on local transport

Union Notes

London transport can be very difficult to negotiate, this is particularly be true for those with certain disabilities that can affect vision, movement etc.

TFL are committed to improving access

Union Believes

Students studying at goldsmiths have been negatively affected and discriminated against by the problems whilst travelling in London

Potential students can be put off of going to university in London through fears of issues and discrimination on transport within London

Despite having clear policies on discrimination and access TFL and its partners are currently failing at meeting their own standards and policies

Union Resolves

To lobby TFL and the providers of public transport services locally to better train and support staff in understanding accessibility issues

The union to support students in the complaints procedure with TFL and their providers.

To work with local disability support groups and activist groups and get involved in the wider campaign to improve our public transport.
